**EXECUTIVE COMMITTEE MEMBER:** Sep 2023 - Present · 9 mos | Domain: Android App Development

The Code Bird | Coding Club | UIT, BU · Part-time | UIT, Burdwan, West Bengal

## FEATURED PROJECTS

### DarpanSur

· A emotion based music recommendation application in PYTHON. This app takes the user's current mood in the form of picture and on the basis of that it navigates the user to a playlist on youtube.

Tech Stack: Python (Programming Language)

Libraries: OpenCV | Mediapipe | Tkinter | Web-browser

[Github](#)

### Jarvis

· Basic python multi tasking platform. This is a passionate project. It doesn't implement A.I or deep learning concepts but the root basics of Python and OOPS concepts are implemented.

Tech Stack: Python (Programming Language)

Libraries: Tkinter | Speech Recognition | Selenium | BeautifulSoup | web-browser | AppOpener

[Github](#)

### Newsy

· A news application. Implemented using Online News Api. This app focuses on providing essential current news in different languages and in different domains like politics, sports, weather and a lot.

Tech Stack: Android | Core Java

Highlight: Readability | OOPS

[Github](#)

### PortFolio Maker

· An android application. This is not a portfolio application actually, it is a platform to get customized personal portfolio where the user can customize his/her portfolio and also can showcase projects, skills,

achievements and more with a very user-friendly interface and also within secure access of personal workspace.

Tech Stack: Android | Core Java | Local Storage | Firebase

Highlight: Flexible code writing | OOPS

### **WeatherApp**

· This is a website where a user can get every little bit of information about the user's current location weather. It mainly focuses on providing updated real-time weather data and forecast details. And the user can give the access of his/her current location to get the weather alerts, and weather forecast related news in a very user-friendly interface.

Tech Stack: Vanilla JavaScript | HTML | CSS | Fetch API | Figma

Highlight: Flexible code writing | OOPS | Security | Responsiveness

[Github](#)
